GENERAL

This report is part of the *Subject Reports* series and presents cross-tabulations of sample data on housing and household characteristics of mobile homes from the 1980 Census of Population and Housing. Data are shown for the United States, its regions, divisions, States, standard consolidated statistical areas (SCSA's), standard metropolitan statistical areas (SMSA's), individual SMSA's with 10,000 or more mobile homes, and certain other geographic areas of the United States.

Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

The abbreviated identification for this report is HC80-3-2 (i.e., Housing Census, 1980-Volume 3-Chapter 2). This report is one in a series of subject reports comprising Volume 3. (See list on page IV.) Each report in this volume concentrates on a particular subject. Generally, detailed information and cross-tabulations will be provided on a national level; in some reports, data for States or SMSA's may also be shown. For a description of the full data dissemination program of the 1980 Census of Population and Housing, see Appendix E, "Publication and Computer Tape Program."

The 1980 total housing unit estimates presented here may differ from those shown in the *Advance Reports*, PHC80-V.

The differences reflect corrections of errors found after the PHC80-V reports were prepared. The changes may affect any geographic area shown in this report. Small differences may also result from the weighting techniques used to inflate the sample figures shown in this report to 100-percent totals. For further discussion of the estimation procedure see Appendix C, "Accuracy of the Data."

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consultation with a wide variety of users of census data, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of the census results. The changes do not, however, affect to any appreciable extent the comparability between the 1980 census data and the 1970 census data for most characteristics. Further information on comparability appears in Appendix A, "Area Classifications and Definitions and Explanations of Subject Characteristics."

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

This report contains text (this introduction and 5 appendixes), a table of contents, maps, and 6 detailed tables. Each table is identified by a table number and title. The "stubhead" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title.

A table finding guide lists the characteristics and various race/Spanish origin groups covered in this report and shows

the tables in which the various types of statistics appear.

Appearing last in the report are the appendixes. Appendix A describes the various area classifications (e.g., urban and rural residence, SCSA's, SMSA's, and urbanized areas) and provides definitions and explanations for the subject covered in this report. Appendix B briefly explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix C presents information on the sources of error in the data and on editing procedures. Appendix D contains facsimiles of the respondent instructions and 1980 census questionnaire pages showing the population and housing questions. Appendix E summarizes the data dissemination program of the 1980 census.

DERIVED FIGURES (Means, Medians, and Percents)

This report presents means, medians, and percents as well as certain ratios. The median—a type of average—is the middle value in a distribution; i.e., the median divides the distribution into two equal parts: one-half of the cases fall below the median and one-half of the cases exceed the median. Percents and other derived measures which round to less than 0.1 are not shown but are indicated as zero (i.e., "—").

Medians for rooms and age are rounded to the nearest tenth, for persons to the nearest hundredth, and for income and gross rent to the nearest dollar. In computing medians for rooms and persons in unit, the whole number is used as the midpoint of the interval so that, for example, the category "3 rooms" is treated as an interval ranging from 2.5 up to 3.5 rooms. In computing median rent, units reported as "no cash rent" are excluded.

The median is computed on the basis of

the distribution as tabulated, which is sometimes more detailed than the distribution shown in this report. When the median falls in the lower terminal category of an open-ended distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; thus, for example, if the median falls in the category "Less than \$100," it is shown as "\$100-." When the median falls in the upper terminal category of an open-ended distribution, the initial value of the terminal category is given followed by a plus sign; thus, for example, if the median falls in the category "\$500 or more," it is shown as "\$500+."

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations are used in the tables:

- A dash "-" represents zero or a percent which rounds to less than 0.1.
- Three dots "... " mean not applicable, or that the data are being withheld to avoid disclosure of information for individuals or housing units. (For further information on disclosure, see the section below on "Suppression of Data for Confidentiality.")

- SCSA is standard consolidated statistical area.
- SMSA is standard metropolitan statistical area.

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the Census Bureau takes precautions that its published data do not disclose information about specific individuals and housing units. To accomplish this, the Bureau suppresses data for characteristics which are based on a small number of persons and/or housing units in the geographic area. Under certain conditions, both primary and complementary suppression, as defined below, may take place.

The general rules of primary suppression of sample data are as follows: estimates of total population by race and Spanish origin are never suppressed; other characteristics for persons are shown only if there are 30 or more persons in the geographic area; estimates of total housing units, vacant housing units, year-round housing units, and occupied housing units are never suppressed; characteristics of year-round housing units which are not classified by occupancy status are shown

only when there are 10 or more year-round housing units in the geographic area; characteristics of families, households, or occupied housing units are shown only if there are at least 10 occupied housing units within the geographic area; and distributions of data for owners or renters are shown only where the number of owners is at least 10 and the number of renters is also at least 10. These primary suppression criteria are applied independently of one another. The comparable figures for complete-count (100 percent data are 15 or more persons and 5 or more housing units of the specified type.

Population and occupied housing unit characteristics cross-classified by race or Spanish origin (of the householder in the case of occupied housing units) are subject to an additional level of examination. This requires that the 30-person or 10-housing-unit criterion stated above be applied individually to each race or Spanish origin category.

Finally, complementary suppression is applied to prevent the derivation of primary suppressed data by subtraction. For example, housing unit data shown by tenure may require complementary suppression when the number of owner-occupied or renter-occupied housing units is less than 10.

CORRECTION NOTE

Shown below are corrections to the rural counts for the United States, regions, divisions, and States presented in this report. Some units were erroneously tabulated as in "Places of 1,000 to 2,500" instead of in "Other rural." The data affected are in tables 1 and 2. Any such incorrect counts have been marked ~~226 364~~ to indicate the error.

In table 1, some of the data are incorrect in the column, "Places of 1,000 to 2,500."

Table 2 has two affected rows of data under the "Urban and Rural and Size of Place" sidehead, "Places of 1,000 to 2,500" and "Other rural." The percentages (model year 1970 to March 1980, source of water by public system or private company, public sewer, central heating system, air conditioning, 3 or more bedrooms, complete plumbing for exclusive use) and the medians (number of persons, rooms, and gross rent) shown in table 2 may or may not be incorrect. Because of the nature of the tabulations, the percentages and the medians are not available from other existing tabulations.

Any additional corrections made after this report is printed are available by writing to the Data Users Services Division, Customer Services (Corrections), Bureau of the Census, Washington, D.C. 20233.
